# 11<sup>th</sup> international symposium on **Molten Salts** Chemistry and Technology

Orleans, FRANCE  
May 19-23, 2019

MS11 will be the 11<sup>th</sup> meeting in a series of conferences that are held approximately every three years, the last occurring in Shenyang, China in 2015, after Trondheim, Norway in 2011.

## SCOPE

The focus of the meeting will be to bring together people from the fields of chemistry, materials science, earth and planetary science, metallurgy who are working in the area of molten salts.

## PRESENTATION

The conference will consist of invited lectures and contributed papers. Contributed papers will be accepted as oral presentations or posters.

## LANGUAGE

The conference language will be in English.

## ABSTRACTS

Participants are requested to submit abstracts. General format of the abstract will be required. Guidelines for the preparation of abstracts can be found on the homepage.

- Structure and properties of molten salts
- Industrial Electrolysis & Electrochemical Engineering
- Fuel cells and MCFC
- Ionic liquids and applications
- Molten Oxides
- Nuclear Energy & Waste Treatment
- Nonferrous metallurgy and high performance materials
- Aluminium electrolysis
- Corrosion & Electrodeposition.
- Modeling & Thermodynamics

## TIME AND LOCATION

The conference will be held from May 19 to 23, 2019 in the **Centre de conférence** d'Orléans located near the center of the town, close to its historic part.
